**Comments**

	Question	Response
1.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Rory is an excellent professor who is so passionate about his job and it shows. He tries to facilitate a classroom for discussion, but for some reason it fell flat in our class.
2.	Please provide any additional written comments on the instructor's strengths and weaknesses.	He works well and is very flexible.
3.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Best teacher I've ever had!
4.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.	This course encourages critical thinking and creativity simultaneously, and it has been so beneficial to me!
5.	Please provide any additional written comments on the instructor's strengths and weaknesses.	The only thing that I included that was not the strongest skill was being able to give feedbacks in terms of grades back in a timely matter. I will say though, it takes some stress off when we are allowed to write rationales and explain our reasons for doing what we do for projects. I feel like these really help the grade!
6.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Easily engages students in the classroom. He wants to hear what I have to say, even if I think it will be controversial and could be taken the wrong way in class. Having a newborn has definitely hindered his ability to grade things in a timely manner, but he does eventually get back to us. A major strength is he gives extensive feedback so you know exactly what you created in your piece. On the other hand, he doesn't always tell us what we did wrong.
7.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Great job engaging the students in class and one on one. He takes time to meet with each student before each project to address questions and any potential problem areas.
	Please provide any additional written comments on the strengths and weaknesses of the course. You may	The reading exercises combined with the QOCs are definitely a negative for me. Much of the reading is pretty extensive and easy to get behind on since it's assigned for every class period. With that said, I've enjoy all of the projects as they are relevant to the course

8.	comment on such things as the use of assignments, text(s), exercises, exams, etc.	objectives while they are also fun.
9.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Rory is really active and engaging in the classroom and seems to truly care about things in the "real world" that are affecting us as students. The only criticism I have is he took a long time getting feedback for projects, but his awareness of this and acknowledgment of it made me feel more at ease.
10.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.	I have taken one of Rory's classes in the past, and I would take another class with him in a heartbeat. Every day I come out of his class thinking about the world in completely different ways; I always seem to keep talking about things that come up in his class with my friends outside of class. I'm always excited to come to class and I'm always excited to read and do projects for him; everything we do feels relevant to my professional life and to the class itself. Overall, I think Rory is one of the kindest, smartest professors I've taken!
11.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Dr. Lee is passionate about what he teaches and delivers the same amount of energy in every class, even when he's clearly sleep-deprived.
12.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.	Since the class is out of 1,000 points, I think too much weight is placed on QQCs and Journal Entries. However the projects are always engaging and the project requirements leave room for creativity.
13.	Please provide any additional written comments on the instructor's strengths and weaknesses.	The discussions are so, so, so important to this class and they are the reason this is my second time taking this professor. The only "improvement" I would say that he can work on is getting grades back in a more timely manner, but I mean he has a newborn so I'm not that butthurt.
14.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.	This class is one of the few I've taken in college so far where I've felt satisfied by the balance of discussion and lecture. The discussions have been the driving force in me learning new things. I think one improvement of the course would be to cut down the readings to the most important ones, and I love the videos but avoid days in which that's all we're doing. Which only happened like once this semester. Videos at the end of class rather than the beginning are a good way to wrap-up.
15.	Please provide any additional written comments on the instructor's strengths and weaknesses.	I liked how Rory had us meet with him before each Major Project. That was helpful because most of the time I would go in doubting my ideas for my project, but come out reassured and knowing what I was going to do. The feedback this semester wasn't very timely, but that could be chalked up to the fact that Rory had a new baby to take care of. It was considerate of him to adjust deadlines based on when he would have feedback to us, though. Overall, Rory is very respectful, chill, and good at teaching.
16.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.	The course objectives and assignments are clearly laid out in the syllabus provided. The class makes the rubrics for the assignments and discusses the various requirements to get a decent grade, which makes the grading system very transparent.
17.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Rory was an awesome professor. I truly enjoyed his class. I love how he tries to connect with his students on a personal/friend basis rather just student & professor. It makes learning the material a lot more fun and interesting. From day 1 I felt really comfortable in his class and you can tell he truly enjoys what he is teaching, which helps the students more interested in learning the content too.
18.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.	I really like how this class is structured. Having 3 mini projects & 3 major projects was a good way to structure the class. It was nice to not worry about memorizing material for an exam and actually able to learn the material I'm doing the project on and be interested in my research. Although the QQC's and Journals did get annoying sometimes, they definitely were a good grade booster and it kept us constantly in the material we were always learning about. Although this class was a lot of hands on work, I liked it a lot better then having exams because with projects, I was able to be more interested in the material and not feel like I just needed to memorize material to pass the test. Also, the projects were super fun to complete which helped a lot too... they were all doable, understandable and informative.
19.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.	I would love to see this class broadened to fit more of a world aspect, rather than just the digital world. Even though it is digital literacy, students should be thinking outside of the box and expanding their knowledge of what they think the world has to offer and what alters if something happens in another part of the world that changes it.
20.	Please provide any additional written comments on the instructor's strengths and weaknesses.	The professor really cares about his students and makes the content relevant and engaging. He is knowledgeable about the subject and his passion for literacy shows.
21.	Please provide any additional written comments on the instructor's strengths and weaknesses.	Dr. Lee was really good at engaging students in conversation about the topics discussed in the course, and really encouraged everyone to contribute.
22.	Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use	This course was one of the best courses I've taken so far at Ball State. The topics were interesting, and I was genuinely excited to

of assignments, text(s), exercises, exams, etc.

attend class each day. the projects were fun and engaging, and the readings really made me think deeply about the topics at hand.

23.

Please provide any additional written comments on the instructor's strengths and weaknesses.

The reason why I only put "agree" for the explains course content clearly, is because your projects are in a way that are "vague" to make us more creatively think!! I hated it at first because I'm a person who sort of needs step by step/"what all do you need from me!?" but I found myself loving it by the second set of projects.

24.

Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.

This course broaded my perspective in so many ways!!! I genuinely loved this class so much. I loved how we tied writing to things I found passionate, that being technology and social media and memes, etc. I feel like I actually know the importance of quotations/fake news/ social-media/ remediations, etc.
