<p>Dr. Lee is probably the best instructor I've ever had. Not just in terms of being an enjoyable professor, which he is, but he has a really great approach to teaching. Other professors that I've had just test us on the materials, in which case I put the information into my short-term memory and promptly forget about it because I never use it. Dr. Lee didn't test us or lecture, but instead had conversations with us about the material and had us apply the information ourselves and make projects. I learned a lot.</p>
<p>Awesome teacher! One of the most easy to talk to professors I've had at BSU.</p>
<p>The assignments made it difficult for me to keep up, because I like to spend a lot of time thinking and working on assignments with clear instructions. The assignments given in the course were given in a very vague manner on purpose (for some reason that I'm still not sure why), but I struggled because I had a lot of trouble figuring out what I needed to do. I like clear cut instructions, but I also like a lot of freedom in doing assignments. There was a lot of freedom, but not enough direction. I liked the course, but it could have been more clear with the given instructions.</p>
<p>Dr. Lee was very easy to understand, provided a lot of feedback,</p>
<p>Rory is one of the most effective teachers I've had. His balance of structure and flexibility is spot on, he explains complex material in a way that makes it simple, and he maintains a classroom environment that is relaxing and conducive to interactive communication. One of my favorite things about the course is his full use of Blackboard and the lack of print materials. Having everything I need through my laptop or phone was incredibly helpful.</p>
<p>He is a really great professor and I enjoy the class it was personalized and fun</p>

Please provide any additional written comments on the strengths and weaknesses of the course. You may comment on such things as the use of assignments, text(s), exercises, exams, etc.

The course is focused, and carefully crafted around the instructor's intentions and goals very well. He proceeded with both purpose and presence and was able to have us go through a lot of material rather quickly and without exhausting us. I liked the pace, even if the term was short.

This course was eye-opening in many ways. I would suggest considering it as a necessary core class.

This course really made me think about a lot of things and try to be creative again and learn about different technologies.
